

An abstract graphic composed of several yellow, rounded rectangular outlines of varying sizes. These shapes are interconnected by thin, continuous yellow lines that form a complex, non-representational pattern. The lines enter and exit the shapes, creating a sense of flow and connectivity. The overall composition is centered on the page.

Her seramikte bir hikaye, her hikayede biz varız.

Etili Seramik İnş. San. ve Tic. A.Ş. 2006 yılı ağustos ayında Çanakkale'nin Çan ilçesine bağlı Etili Köyünde, seramik yer ve duvar karoları üretmek amacıyla kurulmuştur. 2007 yılında 1,5 milyon m²/yıl kapasiteyle porselen yer karosu üretimine başlamış, 2012 yılında duvar karosu, bordür ve dekor fabrikalarının kurulmasıyla toplam kapasitesini 3 milyon m²/yıla çıkarmıştır. Yatırımlarına hız kesmeden devam eden Etili Seramik, 2018-2022 yılları arasında gerçekleştirdiği son teknoloji yatırımlarıyla, toplamda **15 milyon m²/yıl** üretim kapasitesine ulaşmış, her çeşit ve ebatla seramik üretme teknolojisine sahip modern bir üretim tesisi haline gelmiştir. Fabrikamız, **85.000 m²**'si kapalı olmak üzere toplam **265.000 m²** arazi üzerine kurulmuştur.

Özenle seçilen ham maddeler, ileri teknoloji makineler ve deneyimli iş gücümüz sayesinde yüksek kalitede seramikler üretilmekte, dijital baskı teknolojisi sayesinde doğala en yakın görüntü kalitesine ulaşılmaktadır.

Üretimin her aşamasında **kalite** kadar **çevreye duyarlılık** da önceliğimizdir. Üretim sırasında kullanılan suyun tamamı geri dönüştürülerek tekrar üretim sürecine kazandırılmakta, böylece çevreye atık su aktarımı önlenmektedir. Fabrikada oluşan evsel atık sular ise arıtma tesisimizde işlenerek doğaya geri kazandırılmaktadır. Karbon emisyonunu azaltmak amacıyla sıcak baca gazlarının enerjisi geri kazanılarak işletmede yeniden kullanılmaktadır. Üretim sırasında ortaya çıkan, satılamaz nitelikteki ürünler öğütülerek hammadde olarak tekrar değerlendirilmektedir. Ayrıca, toz tutma filtreleri ile temiz ve sağlıklı bir çalışma ortamı sağlanmaktadır. Kullandığımız ambalaj malzemeleri de iş ortaklarımız aracılığıyla toplanarak geri dönüşüme kazandırılmaktadır.

Müşteri zevk ve tercihlerine uygun desen ve renklerde, farklı ebatlarda ürettiğimiz ürünler, yurt içi ve yurt dışındaki bayilerimiz aracılığıyla nihai tüketicilere ulaştırılmaktadır. Üretimimizin önemli bir kısmını ihraç eden firmamız, başta Avrupa ülkeleri olmak üzere dünyanın birçok ülkesinde ürünlerini kullanıcılarla buluşturmaktadır. Ürün ve hizmet kalitemiz sayesinde global pazarda konumumuzu sürekli güçlendirmekteyiz.

Küresel rekabet koşullarına uyum sağlamak amacıyla üretim teknolojimizi sürekli yenilemekte, personelimizi düzenli eğitim programlarıyla değişen teknolojilere hazırlamaktayız.

Etili Seramik, kurulduğu bölgeye doğrudan ve dolaylı ekonomik katkılar sağlamakta, aynı zamanda sosyal sorumluluk projelerine de destek olmaktadır. Tüm bileşenleriyle toplam kalite anlayışını benimseyen firmamız hem yerelde hem de küresel ölçekte **rekabet** ve **verimlilik** kültürüyle sektördeki adını duyurmaya ve güçlendirmeye devam etmektedir.

Etili Seramik Construction, Industry and Trade Inc. was established in August 2006 in Etili Village, located in the Çan district of Çanakkale, with the aim of producing ceramic floor and wall tiles. In 2007, the company began manufacturing porcelain floor tiles with an annual capacity of 1.5 million m². With the establishment of wall tile, border, and decorative tile facilities in 2012, the total production capacity increased to 3 million m² per year. With its continuous investments, Etili Seramik reached a total annual production capacity of 15 million m² between 2018 and 2022 through cutting-edge technological investments. Today, it has become a modern production facility equipped with the technology to produce ceramics in all types and sizes. Our factory is established on a total area of 265,000 m², including 85,000 m² of indoor space.

Thanks to carefully selected raw materials, advanced machinery, and our experienced workforce, we produce high-quality ceramics. Our digital printing technology allows us to achieve appearances that are close to natural images.

Environmental responsibility is just as important to us as quality at every stage of production. All water used in the production process is fully recycled and reused, preventing wastewater discharge into the environment. Domestic wastewater generated in the factory is processed in our purification facility and returned to nature. To reduce carbon emissions, the energy from hot flue gases is recovered and reused within the plant. Unsellable materials produced during manufacturing are ground and reused as raw material. Additionally, dust collection filters ensure a clean and healthy working environment. Packaging materials are also collected through our partners and sent for recycling.

We produce our products in a wide range of sizes, colors, and patterns tailored to customer tastes and preferences, and distribute them to end-users via our domestic and international dealership network. A significant portion of our production is exported, with our products reaching users in many countries, primarily Europe. Thanks to our product and service quality, we are continually strengthening our position in the global market.

To adapt to global competition, we constantly update our production technologies and provide our personnel with regular training programs to keep pace with technological advancements.

Etili Seramik contributes both directly and indirectly to the economy of the region where it was founded and actively supports social responsibility projects. Embracing a total quality approach in all its operations, our company continues to strengthen its reputation in the industry both locally and globally through a culture of competitiveness and efficiency.
